### Maps:

- **A.F. Church Maps:**

Ambrose F. Church's maps are a great genealogical tool because they indicate the name of the heads of households in each community, as well as listing tradesmen and prominent citizens. These large maps include plans of the various townships, names of residents, location of wharves, schools and churches, rivers and roads. The map for Pictou County was published in 1867.

- **Illustrated Historical Atlas of Pictou County Nova Scotia 1879:**

This atlas as well as showing detailed sections of Pictou County also includes sketches of various properties in the area in 1879. Map details include property owner's names, the location of their properties, location of buildings, railways, churches and schools. A history of the County is presented at the beginning of the atlas and a patron's directory is listed at the end. This directory provides patron's names, location, business, PO address, place of birth and date settled (when known).

- Maps showing the **Census Subdivisions** of Nova Scotia based on the Polling Districts 1861, 1871 & 1891.

Various other provincial, county, topographical and street maps.
